Summary

Give me a challenge, and I will overcome it with the best possible solution. That's why I look for challenges, and thrive under them. "Learn first then develop" is my philosophy.

Following is a list of technologies and domains I have a proven track record of using good engineering practices on:

- 6 years of hands-on experience in PHP
- 5 years of experience in MVC Framework (**Laravel, Codeigniter**).
- 4 years of experience in **Rest API Development** in PHP, Laravel and Codeigniter
- **Vuejs, Vuex** for Single Page Application
- Development of E-commerce websites using **Magento**.
- Development of custom admin panel for mobile Apps.
- Strong grip on Backend web services in PHP, Laravel and MySQL database.
- Design and development websites in HTML 5, CSS, Wordpress, JQuery, Ajax , and PSD to HTML conversion.
- Strong Knowledge of bootstrap for developing responsive websites
- Mobile apps development using cross platform (Cordova/Phonegap, jQuery Mobile).

Experience

More than 6 years of experience in Web and Backend development by using PHP MVC Framework (*Laravel, Codeigniter*).

Currently I am working in the Laravel framework in which I developed a food delivery app including a backend with many functionalities. My recent projects are

<http://travel.codestlab.com> and <http://www.foodboy.com> .

I also have 4 years experience in Rest Api development. I have been building Apis in Core PHP, Codeigniter and Laravel

Following is just a partial list of projects chosen to demonstrate my key skills and experience:

- **CT Travel Guide - City Travel Guide Portal**

CT Travel guide is a city multilingual Travel Guide portal that shows interesting places of the city with description and some attributes. This is a platform for helping anyone outsider who visits or stays or works in the city to find information correctly and suitably. Users can also register on this and add his/her visited places, comment and rate the place.

This project is developed in Laravel Framework. Other technologies used for that project are Bootstrap, jQuery, CSS3, HTML5, MySQL.

Role: Senior Web Developer

Tasks: Backend development, Web Services, Website.

Technologies : Laravel Framework, MySQL, Bootstrap, jQuery, AJAX, CSS, HTML

URL: <http://travel.codestlab.com>

- **Foodboy – Food Delivery Site**

FoodBoy, the food delivery app offers Live-Track your orders with different payment methods and no minimum charge.

Listing with over 160 restaurant locations in Riyadh, you can order meals from your favorite restaurants for every taste, occasion, and the location at 24/7.

Role: Senior Web Developer

Tasks: Backend development, Web Services, Website.

Technologies : Laravel Framework, MySQL, Vuejs, Bootstrap, jQuery, AJAX, CSS, HTML

URL: <https://www.foodboy.com>

- **Jihaz Electronics – eCommerce Site**

Jihaz electronics online store allows you to buy products online and it also provides the platform for vendors to sell products. It is still under development but all the functionalities are completed.

Role: Web Developer

Tasks: Design and development of custom CMS, Website.

Technologies :PHP,, MySQL, Bootstrap, jQuery, AJAX, CSS, HTML

URL: <https://www.jihazi.com>

- **Carnegie Surgical – eCommerce Site**

Carnegie Surgical brings you the best of instrumentation for most of your surgery and anesthesia needs. For years, we have made sure that we offer you the highest quality instruments at reasonable prices. We believe in continuous improvement in product quality and customer service.

Role: Web Developer

Tasks: Design and development of custom CMS, Website.

Technologies : Magento, JQuery, AJAX, CSS, HTML.

URL: <http://www.carnegiesurgical.com>

- **Contradictions.pk**

Contradictions.pk customize you furniture completely. It also provides interior decoration and everything is done according to your needs.

Role: Web Developer

Tasks: Design and development of Website.

Technologies : JQuery, AJAX, CSS, HTML.

URL: <http://contradictions.pk/>

- **Roger's Mushroom**

The Roger's Mushrooms App is the perfect tool for learning about and identifying mushrooms, and for networking with other mushroom hunters. The app offers the most complete catalogue of wild mushrooms and fungi across Europe and North America, featuring over 2,600 photographs of 1,650 fungi species that have been collected in the wild by renowned mycologist and bestselling author Roger Phillips and other senior mycologists from America and Europe.

Roger also introduces users to cooking mushrooms and shares some of his favorite mushroom recipes for users to try out. Users can personalize their experience by adding comments and images throughout the app, and by recording details of the mushrooms they spot on a satellite map.

Multiple social features are integrated including being able to engage the wider user group in helping identify mushrooms, and inviting other users on mushroom forays.

Role: Web Developer

Tasks: Backend development, development of custom CMS, App Landing Page.
